Same causal visibility, different physical attention problem
(b) Preserve the numerical paths; change where the cut is paid
SIMPLE · whole-call cut
Projection: 3-column tail
1 col.
Attention · 768
1024
Output proj. / FFN: 3 rows
1 row
LOCAL · attention-only cut
Projection: one four-column group (a = 4)
Attention: first 3 rows · 768
last · 1024
Output proj. / FFN: all four rows
(c) Own every requested output; commit the accepted prefix
Outputs in row order
z0
