Faster fixed-work execution can coexist with slower service

Four origin aggregates per cell

Per-arm counts; same emitted total

16 roots; original 98.75% intervals

Each arm: 11,472 emitted tokens; verified rows 14,016 → 18,368; proposals 10,512 → 16,072.

Windows RTX: fixed-work operation and live resident-service measurements have separate clocks.
