B570 draft CPU threads 8 to 1: fixed-input reference-qualified costs
Fresh-context service after registered warmup; fixed panel, no population confidence interval
Draft CPU policy and identical-code control
Candidate request vs target-only
Service cost difference (%) • lower is better
DRAFT1 / target-only service ratio
DRAFT1 / dual-BASE, paired session
BASE_A / BASE_B control
Per-input geometric mean
2% practical screen
